

MULTI GEMINI

Type of product

Multi-game

Overview

Casino Technology has established itself as a renowned producer of multi games, whose popular products Mega Jack and Gamopolis have achieved continued success. At the beginning of 2007 Casino Technology launched their new series, Multi Gemini.

The concept behind this product is to provide operators with a multi game mix of the best current video-slot performers from Casino Technology within a single unit. These individual games have had resounding success, and are now offered in a variety of different configurations. With Multi Gemini Casino Technology aim to offer operators more options in managing their slot floors, along with flexible space saving solutions and more diversity for players. The Multi Gemini from Casino Technology caters for all player levels from low-denomination to VIP.

Each release from Multi Gemini series contains 4 or 5 single games, which is optimal to provide the needed variety to the player. The most innovative and valuable feature introduced with this range is the module principle, which allows an option one game to be replaced with another on the same platform, after certain period of time. This makes wider selection and greater convenience for the operator and the player.

MULTI GEMINI in brief

- A collection of multi-game products from the GEMINI series, developed on a module base
- Over 20 single Casino Technology games, with a proven performance, available in different combinations
- Each release offers a smart selection of 4 or 5 video-slots within single unit, selectable by the player on a multi-game screen
